"Be the change that you want to see in the world."

Summary

As an IT Software Engineer Associate at Danske IT Merger Infosys, I excel in .NET, SQL, PCI DSS, AWS, Java, microservices, and API development. With a proactive and optimistic approach, I tackle challenges head-on. Committed to continuous learning, I bring enthusiasm and determination to every project, consistently delivering exceptional results.

Professional Experience

Danske IT and Support Services India Pvt Ltd (Merger Infosys)   *Bangalore, India*
IT SOFTWARE ENGINEER, ASSOCIATE   *Jan. 2022 - Present*

- As a Cloud FullStack Engineer intern at Danske IT Merger Infosys in Bangalore, India (Jan-Jul 2022), gained hands-on experience in .NET and Docker within the Card Product Domain.
- Transitioned to IT Software Engineer Associate at Danske IT Merger Infosys, focusing on the Card Management Domain in Bangalore, India. Built and managed APIs using .NET, DB2, SQL, Docker, and Azure to enhance performance and user experience.
- Implemented process improvements in card management, utilizing Docker, OpenShift, Argo CD, and Azure pipelines at Danske IT Merger Infosys, Bangalore, India.
- Expanded skillset by learning AWS and actively contributing to software application development and management at Danske IT Merger Infosys in Bangalore, India.
- As an Agile champion at Danske IT Merger Infosys, Bangalore, India, guided cross-functional teams for efficient project delivery, leveraging expertise in .NET, Docker, Azure, and other technologies.
- Collaborated on cross-functional teams at Danske IT Merger Infosys, Bangalore, India, delivering high-quality solutions as a Software Engineer Associate.
- Contributed to PCI-DSS compliance initiatives within the Card Management Domain at Danske Bank, ensuring compliance with GDPR and PCI-DSS.

UBS   *Pune , India*
SOFTWARE ENGINEER   *Aug. 2021 - Sept. 2021*

- During my internship, successfully built a stock recommendation portal using React.js and Spring Boot, which was utilized by advisors and customers.
- Developed interactive user interfaces using React.js, providing seamless user experience for stock recommendations.
- Utilized Spring Boot for backend development, implementing robust and scalable REST APIs for data retrieval and processing.
- Gained hands-on experience in full-stack development, integrating frontend and backend technologies to create a functional and user-friendly stock recommendation portal.
- Demonstrated ability to quickly adapt to new technologies and deliver high-quality code, contributing to the success of the project and gaining valuable experience in building real-world applications.
